EDUCATION

The University of Chicago

Bachelor of Arts in Economics and Mathematics

- **GPA:** 3.950
- **Dean's List**, 2023–2024.

Expected, June 2027

Chicago, IL

RESEARCH

Research Assistant under Professor Shaoda Wang and Professor Daniel Li Chen

April 2024 –

Research Assistant

- Developed pipeline for crawling legal documents in court cases involving expert witness. Downloaded over 3M relevant documents and metadata for over 1.5M cases.
- Developing pipeline for extracting key variables in court cases using various NLP techniques.

Becker Friedman Institute Summer Internship Program; MiiE Lab

June 2024 – August 2024

Research Assistant

- Supported Professor Adukia in her work to analyze images and texts in textbooks, children's books, and yearbooks using computational methods.
- Crawled yearbook data from dynamic websites, and ran computer vision pipelines to estimate demographic compositions.
- Assisted in the development of a version of the Implicit Association Test using OpenSesame.
- Ran various natural language processing algorithms on news articles, including VADER sentiment analysis, VAD analysis, log odds ratio with Dirichlet prior, **power and agency analysis**, topic modeling, word embedding, and zero shot classification.

UChicago Mathematics Research Experience for Undergraduates (REU)

June 2024 – September 2024

Apprentice Researcher

- Studied operator theory and authored an **expository paper** on spectral theory and the min-max theorem, which gives a variational characterization of the discrete eigenvalues of a self-adjoint operator below the essential spectrum.

Nationalism Sentiment during Covid-19 in China

February 2023 – March 2023

Research Assistant

- Utilized Python to scrape blogs posted on Weibo from 2018 to 2022, focusing on topics related to the US, collecting data for sentiment analysis.

LEADERSHIP & ACTIVITIES

Recognized Student Organization: Oeconomica

October 2023 – Present

Coleader of the Macro and Financial Economics Cohort 2024–2025

Member of the Econometrics Cohort 2023–2024

Chicago, IL

- Gave weekly lectures on asset pricing models and Python for economics research.
- Attend weekly lectures and faculty talks, learning about causal inference, linear regression, R, instrumental variable, \LaTeX , and acquiring insights into the latest faculty research.

Popular Science Articles

January 2023 – Present

Organizer & Creator

- Wrote several articles on behavioral economics, touching on topics including expected utility theory and prospect theory, risk aversion and loss aversion, status quo bias, economic games, social preferences and altruism, competitiveness and the gender equality paradox, framing effect, and scarcity theory.
- Created mathematical animations for economics concepts using Python and **Manim**. [GitHub].

Online APA7 In-Text Citation Checker [GitHub]

June 2022 – August 2022

Developer

- Designed and developed a **webpage** utilizing JavaScript and RegEx to check the format of APA7-styled in-text citations.

SKILLS

Programming: Python, C, C++, R, JavaScript, HTML, CSS, Tcl

Tools: Git, NLTK, Jupyter, \LaTeX , Pandas, NumPy, BeautifulSoup, Selenium, SciPy, Django, Manim, Jekyll, VMD

Language: Native in Mandarin Chinese
